8. Seeding Procedure. Per the direction of the Southwest District Athletic Board, all teams in a bracketed tournament will be seeded. All online voting materials will be emailed to the Athletic Director who will provide this information to the coach. The coach will make comments pertinent to his/her team online from Sunday, October 1 to Wednesday, October 4. Online voting will begin on Thursday, October 5, 2017 and conclude at NOON on Saturday, October 7, 2017. The mandatory coaches meeting will be held on Sunday, October 8, 2:00 p.m. for boys soccer; 3:00 p.m. for girls soccer. The tournament manager will distribute in either written form or spreadsheet the tally of all votes at the manager's meeting on Sunday, October 8, 2017. All ties will be broken prior to the placement of teams on the brackets.

By board action, starting with the 2011-2012 tournaments, the coach can not vote for his school in the seeding process, and the highest and lowest votes for each school will be dropped in the final tabulation. By board action, starting with the 2013 spring tournaments, a coach that does not vote in a bracketed tournament loses his highest score, second highest score, and lowest score prior to final calculation.

Once that the seeds are determined for each team in the tournament, the seeds will go on the brackets in order of seed. The first seeded team will go followed by the second seeded team. Any team may choose to pass, and if it does so, the next seeded team will be given a choice to go on the bracket. After a seeded team goes on the bracket, the seeded team that passed will again be given an opportunity to go on the bracket. This process will continue until the brackets are filled.

Any team that does not show at the tournament placement meeting will go on the bracket last. Any school that does not vote online by Saturday, October 7, noon, will not be permitted to vote at a later time and his next highest vote will be dropped prior to final tabulation. Any school that does not meet voting requirements but does attend the placement meeting will receive the votes that the school received for seeding purposes and will be seeded accordingly. If a coach is late for the seed meeting and has missed his opportunity to go on the bracket, his absence will be considered as a pass, and will be given an opportunity to go on once he is in attendance. If more than one coach does not show up, the tournament manager will flip a coin to determine the order of placement on the bracket.

Per action of the State Board of Directors, the following fine structure is in place:

24. **Inclement Weather Policy**

Monitor Weather Patterns – Be aware of potential thunderstorms by monitoring local weather forecasts the day before and morning of the competition, and by scanning the sky for signs of potential thunderstorm activity.

National Weather Service – Weather can also be monitored using small, portable weather radios from the NWS. The NWS uses a system of severe storm watches and warnings watch indicates conditions are favorable for severe weather to develop in an area; a warning indicates severe weather has been reported in an area, and everyone should take proper precautions. Any thunderstorm poses a risk of injury or death even if it does not meet the criteria for severe weather. Therefore, anytime thunderstorms are in the forecast (even if it is only a 20 percent chance), event organizers should be at a heightened level of awareness to the potential danger of lightning.

Management

Evacuation - If lightening is imminent or a thunderstorm is approaching, all personnel, athletes and spectators **shall** evacuate to available safe structures or shelters. A list of the closest safe structures should be announced and displayed on placards at all athletic venues.

Thirty-minute rule - Competition or practice shall be suspended once lightning has been recognized or thunder is heard. It is **mandatory** to wait at least **30 minutes** after the last flash of lightning is witnessed or thunder is heard prior to resuming practice or competition. Given the average rates of thunderstorm travel, the storm should move 10-12 miles away from the area. This significantly reduces the risk of local lightning flashes.

Any subsequent lightning or thunder after the beginning of the 30-minute count shall reset the clock, and another count shall begin.
